

M. S. Musab

Senior Software Engineer | Flutter & Laravel Specialist | AI-Enhanced Solutions
musab.dot@gmail.com | +94 706 513 162 | Puttalam, Sri Lanka | musabibnusriraj.github.io

PROFESSIONAL SUMMARY

Full-Stack Engineer with 8+ years of experience building scalable web and mobile applications using Flutter, Laravel, React, and Node.js. I lead cross-functional teams, define architectural standards, and deliver production-ready products that serve thousands of active users. My work emphasises AI/LLM integrations, cloud-first infrastructure with AWS, robust REST APIs, and pragmatic DevOps (CI/CD, Docker). I care about clean code, mentoring engineers, and high-performing user experiences. Available for freelance and full-time opportunities.

TECHNICAL SKILLS

Languages & Frameworks: Flutter · Dart · Laravel · PHP · TypeScript · React · Node.js · Next.js

Cloud & Infrastructure: AWS (EC2, S3, RDS, CloudFront) · Docker · Firebase · Supabase · CI/CD · DevOps

Databases: MySQL · PostgreSQL · MongoDB · Redis

Tools & Practices: REST API · Git / GitHub · Stripe · AI/LLM APIs · Agile/Scrum

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Imara Software Solutions | June 2023 – Present

- Led and managed a cross-functional engineering team, overseeing project delivery, sprint planning, and technical direction across multiple concurrent products.
- Defined and enforced architectural standards for Flutter and Laravel-based applications, ensuring scalability and maintainability.
- Collaborated with product managers and stakeholders to translate business requirements into actionable technical roadmaps.
- Drove adoption of AI/LLM integrations across client solutions, improving automation and user engagement.
- Conducted regular code reviews, technical interviews, and mentoring sessions to upskill team members.
- Managed cloud infrastructure on AWS, streamlining CI/CD pipelines to reduce deployment times significantly.
- Led mobile development for a Flutter-based e-commerce application, delivering Android and iOS apps with REST API integration, push notifications, and offline support.
- Architected and delivered multiple cross-platform mobile and web applications using Flutter (frontend) and Laravel (backend API), serving thousands of active users.
- Led development of Checklogix — a full-stack SaaS platform with Stripe subscription billing, real-time features, and iOS/Android/Web deployment.
- Integrated AI/LLM capabilities into client products to automate workflows and enhance user experience.
- Designed cloud infrastructure on AWS (EC2, S3, RDS, CloudFront) with automated CI/CD pipelines.
- Mentored junior engineers, established code review processes, and drove adoption of best practices across the team.

Software Engineer

Imara Software Solutions | January 2021 – February 2023

- Developed and maintained cross-platform mobile and web applications using Flutter and Laravel.
- Built and integrated RESTful APIs, third-party services, and payment gateways for client projects.
- Collaborated closely with product and design teams to deliver high-quality features on schedule.
- Contributed to code reviews, testing, and deployment processes within an agile development environment.

Software Developer

Imara Software Solutions | November 2018 – January 2021

- Developed full-stack web and mobile applications with focus on UI/UX design and scalable architecture.
- Implemented RESTful APIs and database integration for seamless data flow.
- Collaborated with cross-functional teams to deliver responsive and user-friendly applications.

KEY PROJECTS

Kapruka Shopper: AI-powered shopping assistant built with GPT, MCP, React, and TanStack Start. Ranked 2nd in the Agent Challenge among 20 finalists from 800+ participants.

Campus To Career: Cross-platform Flutter app connecting students to showcase projects, share milestones, build public portfolios, follow career roadmaps, and network with peers and mentors. Led mobile development with BLoC architecture, REST APIs, and iOS/Android deployment. <https://campustocareerplatform.com/>

InfyBooks: Invoicing and business finance platform with multi-company support, customer portal, recurring invoices, purchase orders, vendor bills, PDF templates, financial reports, and a module marketplace — built with Laravel, Vue.js, Docker, and AWS S3 <https://infybooks.online/>

Success Call: Comprehensive mobile and web prayer times app for Sri Lanka Muslims with ACJU Hijri calendar, multi-language support (English, Sinhala, Tamil, Arabic), offline functionality, auto-silence during prayers, home widgets, and customizable Iqamah times. <http://successcall.github.io/>

CheckLogix: Cross-platform compliance and documentation SaaS with Flutter frontend and Laravel backend. API-first design with JWT auth, Stripe subscription billing, AI-powered checklist and log form creation, and enterprise-grade architecture — deployed on iOS, Android, and Web. <https://checklogix.org/>

MailFast: Next-day international parcel booking platform built with WordPress. Integrates CourierAPI for shipping, PayPal payments, competitor price comparison, QR code generation, and parcel booking features.

MI Invitation & Rewards Platform: SaaS invitation platform with Flutter app and React dashboard. SMS invitations, gamified points from engagement and ad views, prize games, and admin analytics — built with MERN stack and AWS S3.

Jarvis (HUBEUROPE): Enterprise logistics and courier management system with shipment tracking, customer/billing management, courier API integration, and financial reporting. Integrates Xero for accounting and AWS S3 for storage — built with Laravel and Vue.js.

EDUCATION

Bachelor of Science in Computer Science

Kingston University, London, United Kingdom

Relevant coursework: Software Engineering, Algorithms & Data Structures, Database Systems, Cloud Computing, Artificial Intelligence.
